

Research Methodology Fellowship

Lincoln, NE; Omaha, NE

Gallup is an enduring, prospering management consulting company that is committed to helping organizations improve their business performance and develop better leaders, more productive employees, and more profitable customers.

Our purpose is simple: to use more than 70 years of our own research into human nature and behavior to help organizations and individuals maximize their performance through measurement tools, coursework, and strategic advisory services. Our approach enables us to identify, develop, and implement solutions that align with our clients' visions and strategies.

Gallup is proud to announce the Gallup Research Methodology Fellowship at the University of Nebraska-Lincoln (UNL). This fellowship through UNL-SRAM (Survey Research and Methodology Program) will be offered for the first time in the 2009-2010 academic year and will include full tuition for a year toward a master's degree (two years) or Ph.D. (three years) in survey research methodology with a monthly stipend during the academic year.

The Research Methodology Fellow will benefit from the mentorship of Gallup Senior Scientists and be an integral part of the global influence affiliated with working on Gallup's World Poll. This fellowship also offers the unique opportunity to secure an advanced degree in survey research methodology and work on research projects with UNL-SRAM faculty.

Qualifications: Candidates for this fellowship must be successful graduating seniors interested in pursuing a master's degree or Ph.D. in survey research methodology or, for those pursuing a Ph.D., successful MS graduates in relevant disciplines. Upon completion of their advanced degree, Gallup Fellows are given top priority for full-time professional opportunities at Gallup. Undergraduates and graduates with completed degrees in social, behavioral, and related sciences are strongly encouraged to apply. Candidates with a special interest in the design and implementation of global opinion surveys, data analysis, methodology, and writing and reporting of results should find this opportunity to be an excellent match for them.

Upon successful completion of the initial application and talent assessment, candidates will be asked to complete the necessary UNL-SRAM application process to be considered for admission into the university program.
